

NOTES FROM THE OCTOBER, 2008 MEETING

The main topic of the meeting was the presentation of the 2007 Annual Noise Report. There was discussion of several items in the report. Sara Arnold was commended on the quality of the document.

The letter writer was invited to the meeting, but has not yet contacted the chair.

The chair requested that the minutes from September reflect that all representatives from the Hanscom towns who were present at the meeting voiced strong support for the military mission of Hanscom and that there was no opposition to operations by the military. It was noted that this support has been expressed in the past.

There was an informal discussion of what Massport is doing to control stormwater and how they treat it and dispose of it. Massport was very helpful in explaining how their stormwater program works and the information they gave was appreciated.

It was noted that the Web site has been brought up to date. If there should be other documents on the site, send the Webmaster an e-mail.
